

Setting Up Web Result Hosting Options

In Scorer, Options Screen, FTP tab

The password may be obtained from BridgeNZ

You are now set up to send.

ALSO SEE: "Web Results – Attaching Files" at <http://bridgenz.co.nz/NZBScorer/index.php>

Sending results from pairs events is now simple from the results screen:

Tick the "Upload XML file to FTP site" box then click the XML button.

All done – your results should be available through bridgenz.co.nz

Occasionally a system will have a firewall in place, and ask if the ftp is allowed to be sent. You must permit this to be sent by saying OK or Yes, or it won't be allowed off your computer.
